# Illustrations

# Missing figures in Markdown

The following figures are not covered by Markdow syntax :

- reference through anchor to refer to a section in your document
- definition list
- comment
- format: strikethrough, subscript, superscript, underlined
- environment: {{{ ... }}}
- tables: they seem to exist in some particular spec, but we didn't find them in CommonMark ones

As a consequence we can think of using Pillar syntax to generate those figures, as the current Pillar parser is working.
